### Number 1/2

- |                                                                               |                                                                                                                                                                                        |
|-------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| SULTAN AL-KHALAF and<br>ABDALLA EL-KHALADI                                    | 1 Brucellosis of camels in Kuwait                                                                                                                                                      |
| S. A. AL-IZZI and L. S. AL-BASSAM                                             | 5 <i>In vitro</i> susceptibility of <i>Pseudomonas mallei</i> to antimicrobial agents                                                                                                  |
| M. C. GALLEG0, F. CUELLO<br>and A. GARRIDO                                    | 9 <i>In vitro</i> determination of phagocytosis and intracellular killing of <i>Brucella melitensis</i> by goat's polymorphonuclear phagocytes                                         |
| F. MADEC, CL. KAISER, J. M. GOURREAU<br>et F. MARTINAT-BOTTE                  | 17 Conséquences pathologiques d'un épisode grippal sévère (virus swine A/H <sub>1</sub> N <sub>1</sub> ) dans les conditions naturelles chez la truie non immune en début de gestation |
| D. KLIMUSZKO, Z. M. SZYNKIEWICZ,<br>A. PIEKAROWICZ, M. BINEK and<br>U. WÓJCIK | 29 Transfer of plasmid Hly <i>in vivo</i> in pigs intestine                                                                                                                            |
| J. B. HUDSON, P. F. WHYTE and<br>R. SUBRAMANIAM                               | 39 Properties of the immunosuppressive factor induced by murine cytomegalovirus                                                                                                        |

### Number 3

- |                                                                                                 |                                                                                                                             |
|-------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| GERARDO IGLESIAS and<br>JAMES W. HARKNESS                                                       | 47 <i>In vitro</i> comparison between four variants of Aujeszky's disease virus                                             |
| RONALD BARTZATT and<br>GARY A. ANDERSON                                                         | 57 Ribavirin inhibits proliferation of bovine respiratory syncytial virus <i>in vitro</i>                                   |
| TSEHAY NEWAY, FRANCINE BARRAT,<br>JEAN-MARC PERSON,<br>HENRI-JEAN BOULOUIS and<br>CHARLES PILET | 63 Immunomodulatory properties of a strain of <i>Mycobacterium chelonae</i> . I. Mouse lymphocyte responses <i>in vitro</i> |
| G. CASTRUCCI, F. FRIGERI,<br>M. FERRARI, V. ALDROVANDI<br>and F. TASSINI                        | 71 Further studies on passive immunization of newborn calves against rotaviral infection                                    |

K. A. ONYIA

GOSSE BIJLENGA and PHILIPPE DUCLOS

ASHIR KUMAR, MARK C. LEONARD  
and RONALD P. CLEVELANDM. SNEYERS, C. THIRIART,  
C. BRUYNS, A.-F. LAMBERT,  
C. COLLIGNON, A. SCHWERS,  
P. COPPE, H. ANTOINE,  
J. D. FRANSSEN, J. URBAIN,  
L. KARELLE-BUI and  
P.-P. PASTORET

J. F. GUELFY et D. E. KRAOUCHI

ATTILA NAGY, ÉMILE VANDERSMISSEN  
and PÁL KAPPJ. G. MOHANTY, Y. ELAZHARY  
and B. TALBOTMASAMI MOCHIZUKI and  
HISASHI FURUKAWAE. ABA-ADULUGBA, R. A. JOSHUA  
and O. O. ODUYE

J. G. MOHANTY and Y. ELAZHARY

77 *In vivo* chemotaxis of oxidised lipids: 1. Chemo-  
tactic effects of oxidised arachidonic acid on rat  
leucocytes83 Isolation and plaque purification of a syncytial  
forming component of myxoma virus

## i New Patents Section

## Number 4

91 Development of a leukocytopenic baby guinea pig  
model with azathioprine and cyclophosphamide95 Detection of rotavirus in faecal specimens with a  
monoclonal antibody enzyme-linked immuno-  
sorbent assay: comparison with polyclonal anti-  
body enzyme immuno-assays and a latex  
agglutination test105 Effets d'une dose unique de dexaméthasone sur la  
production d'anion superoxyde et sur le chimio-  
tactisme des polynucléaires neutrophiles sanguins  
du cheval115 Further data to the aetiology, pathogenesis and  
therapy of infectious bovine keratoconjunctivitis129 Detergent solubilised bovine viral diarrhea virus  
elicits a similar immune response as the inactivated  
virus139 An enzyme-linked immunosorbent assay using  
canine coronavirus-infected CRFK cells as antigen  
for detection of anti-coronavirus antibody in cat147 Effect of temperature on the sodium sulphite  
precipitation test for assessment of goat serum  
immunoglobulin153 Purification of IgG from serum with caprylic  
acid and ammonium sulphate precipitation is not  
superior to ammonium sulphate precipitation  
alone
